**Set Up Camera**

Displays a main interface where users can navigate to the camera from the profile screen using a dedicated "Go to Camera" button. The user can choose whether to use the front (selfie) or rear camera when capturing photos. A back button is also available, allowing the user to return easily to the MyProfile screen.
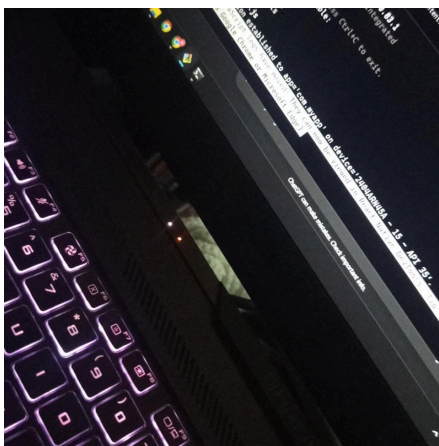

# Apply Filters & Add Filter Intensity Sliders

Shows the available filters Grayscale, Sepia, Brightness, and Contrast with adjustable intensity sliders for fine control. Users can preview their photo with different filters, retake, crop/rotate, or save the photo after editing.
